

LOUIS RUBLÉ - Aspiring PhD student in Human-Robot Interactions

✉ rublelou@etu.utc.fr  [Louis Rublé](#)  [sioulruble](#)  [sioulruble.github.io](#)

EDUCATION

 **Master of Engineering in Computer Science** 2022 – 2025
Université de Technologie de Compiègne, France

- **Selected Coursework:** Computer Vision, Autonomous Robots, Machine Learning, Algorithms and Data Structures, OOP, Introduction to Cognitives Sciences
- **Exchange Program:** Semester in Zaragoza, Spain | Master of Robotics, Graphics and Computer Vision

 **2-year University Diploma in Electrical & Computer Engineering** 2020 – 2022
IUT de Cachan, France

Selected Coursework: Signal Processing, Embedded Systems, Electronics, Control Systems

WORK EXPERIENCE

 **Humanoid Robot Teleoperation Research Assistant** Oct 2025 – Apr 2026
AIST-CNRS JRL — **Tsukuba, Japan**

Developing a **humanoid teleoperation platform** with RGB-D feedback (ROS2 + Unreal) to improve operator precision. Designing and running a repeated-measures **user study** to quantify learning curves, workload, and performance differences across **visual feedback** conditions.

 **Social Robotics Engineering Intern** Sep 2023 – Feb 2024
Enchanted Tools — **Paris, France**

Developed a **multimodal platform** using facial landmarks, ASR and Speech Source Localization (SSL) in Python to enhance **active speaker detection**, programmed and integrated new **natural character behaviors** into the robot using Godot, C++.

 **Affective Computing Project Assistant** 2024 – 2025
Université de Technologie de Compiègne (UTC) — **Compiègne, France**

Developed an **AR-based** VR-headset simulation and built an associated emotion-recognition dataset. Designed a **real-time emotion recognition app** (Streamlit + OpenFace) and optimized PyTorch **LSTM models** reaching 70% accuracy on temporal sequences.

 **Image Processing Intern** May 2022 – Aug 2022
Laboratoire Signaux & Systèmes — **Gif sur Yvette, France**

Ported and optimized an **image-reconstruction algorithm** from MATLAB to Python, improved runtime.

PUBLICATIONS (in progress)

In preparation (2026): User study on RGB-D feedback for humanoid robot teleoperation (AIST-CNRS). Target venue: ICSR.

SKILLS

- **Programming Languages:** Python, C/C++, Matlab, Lisp
- **Frameworks & Tools:** Git, ROS, Gazebo, Linux, Qt
- **Libraries:** NumPy, Scikit-learn, OpenCV, TensorFlow/PyTorch, Matplotlib, Pandas
- **Languages:** French (Native), English (Professional Proficiency), German/Spanish (Beginner)

EXTRACURRICULAR

- **Art** : Screened films for 60+ people at UTC's cineclub, write speculative SF exploring societal themes.
- **Chess** : Competitive player with 2100 elos rating, ranked among top 15 players in France U-18 category.
